SUMMARY

Full Stack Developer with 4 years of experience, specializing in front-end performance, accessibility, and scalable architecture. Delivered headless commerce solutions for global e-commerce brands including Moncler, Stone Island, Geox, and Legami. Skilled in **React.js, Next.js, TypeScript, Node.js, GraphQL, and CMS integrations**, with proven success in **SEO optimization, WCAG compliance, and Core Web Vitals**. Adept at building reusable UI components, implementing CI/CD pipelines, and collaborating cross-functionally to drive technical excellence.

WORK EXPERIENCE

Rextart S.r.l

Turin, IT

Full Stack Developer - Consultant to Reply

Feb 2023 - Oct 2025

- Delivered scalable, high-performance solutions for **global e-commerce brands** including **Legami, Moncler, Stone Island, and Geox**, acting as a trusted consultant to Reply.
- **Led Legami's migration** from Salesforce Reference Architecture (SFRA) to a headless architecture using **SFCC PWA Kit (React.js/Next.js/Node.js)**, achieving a **60% reduction in page load times** and boosting engagement across mobile and desktop.
- Contributed to **Moncler's headless migration**, improving scalability and reducing load times by **40% for 2M+ monthly visitors**.
- Designed and implemented **reusable UI components** integrated with Salesforce CMS (SFRA, Page Designer) and Contentstack CMS, enabling dynamic content updates and increasing marketing workflow efficiency by **30%**.
- Championed **SEO best practices** (semantic HTML, structured data, performance tuning) and ensured **WCAG 2.1 compliance**, resulting in a **25% uplift in search rankings** and broader customer reach.
- Directed cross-functional collaboration with designers (using **Figma**) and backend engineers to translate **UX/UI** into **pixel-perfect**, scalable React/Next.js components, ensuring visual precision and interaction quality aligned with luxury brand standards.
- Contributed to shared design systems and component libraries (**Storybook, Radix UI, PandaCSS**), applying atomic design principles to build reusable, scalable components that accelerated development and improved consistency across projects.
- Established clean code practices, **CI/CD** pipelines, and modern front-end tooling (**TypeScript, Tailwind CSS, Webpack**), supporting scalable development, continuous delivery, and long-term maintainability.
- Developed proof-of-concepts leveraging **component-driven development and experimentation strategies**, influencing long-term architectural decisions and accelerating digital transformation initiatives.
- Built specialized modules such as the **Asset Tracking System (ATS)** for workforce and equipment allocation, integrating **real-time geolocation and data visualization** with **Leaflet** and **ChartJS**.

IMPAKTER SA

Rome, IT

Full Stack Developer

Aug 2022 - Jan 2023

- Developed performant, responsive web applications using **React.js, TypeScript, Redux Toolkit, GraphQL, and Tailwind CSS**, applying modern web development best practices.
- Built and maintained reusable front-end components and shared libraries, improving development efficiency and ensuring consistency across the platform.
- Collaborated with designers, developers, and system administrators to align software development efforts with product vision, user needs, and technical constraints.
- Contributed to the full software development lifecycle using **Node.js, Express, MongoDB, and GraphQL**, with a focus on clean code, debugging, and performance optimization.
- Defined and communicated technical and design requirements, supporting architectural decisions, system scalability, and long-term maintainability. Implemented modular, secure backend logic with attention to web security principles, including input validation, authentication flows, and API protection across distributed services.

Kenzie Academy Brazil

Rome, IT

Front End Developer - Peer Coach

Jan 2022 - Jul 2022

- Provided hands-on tutoring and technical coaching in **Front-End** technologies including **TypeScript**, **JavaScript**, **HTML**, **CSS**, and **React.js**, supporting students through real-world application development.
- Guided learners in mastering advanced libraries and patterns such as **Redux**, **Context API**, **Material UI**, and **Styled Components**, emphasizing clean architecture and scalable design.
- Delivered personalized feedback and code reviews, identifying areas for improvement and teaching best practices in performance, accessibility, and maintainability.
- Fostered problem-solving skills and technical confidence by helping students debug issues, optimize code, and apply modern development techniques.
- Led course onboarding sessions for new students, introducing curriculum structure, tooling, and expectations to ensure a smooth transition into the program.
- Promoted principles of clean code, **DRY**, and component reusability, preparing students for professional development environments.

EDUCATION

Kenzie Academy Brasil

Full Stack Web Developer; Information Technology

Curitiba, Brazil

Graduation Date: Jul 2022

SKILLS

- **Languages:** **Portuguese** (Native), **English & Italian** (Full Professional Proficiency);
- **Front-End:** React, Next, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, Chakra UI, PandaCSS, Material UI, Styled Components, ChartJS, Leaflet;
- **Back-End:** Node.js, Express.js, GraphQL;
- **Databases:** SQL, PostgreSQL, MongoDB;
- **Cloud & DevOps:** AWS (S3), Git, CI/CD pipelines;
- **CMS & Architecture:** Salesforce SFCC (PWA Kit, SFRA, Page Designer), Microsoft Azure CMS, Headless CMS integration;
- **Methodologies:** Agile, Scrum, Kanban;
- **Performance & SEO:** SEO optimization, accessibility (WCAG), Core Web Vitals, Webpack;
